

Countersunk Phillips Resin Screws

Model SFHPPM()-L

PP Polypropylene / Engineering Plastics

Polypropylene is a thermoplastic resin which can be widely applied in various products and purposes through adopting different formulas or modified by using additives. PP has the advantage of ease of processing and low cost, which can satisfy different market demands. Therefore, it has become a very competitive plastic product compared with other expensive resins.

Product Properties

1. Low cost and ease of molding.
2. Light specific weight and low water absorption.
3. Durability in appearance.
4. Chemical stability.
5. Versatile use on many parts.

Applied industries
