

# Nuts

Model NPVDM( )

**PVDF** Fluorine Resin / Advanced Engineering Plastics

Among the group of Fluoropolymers, PVDF (Polyvinylidene Fluoride) has the premium properties as the best mechanical strength and toughness, low friction coefficient, strong corrosion resistance, anti-aging, weather resistance, anti-radiation, etc.

Product Properties

1. Excellent chemical resistance to most of aggressive solvents.
2. Excellent mechanical strength & high abrasion resistance.
3. Continuous use temperature up to 150°C.
4. Excellent ageing resistance.
5. Resistance to UV and nuclear radiations.
6. Excellent intrinsic fire resistance.

Applied industries

## Specs

Model: NPVDM( )

M	3	4	5	6	8	10	12
DxH	5.5x2.4	7x3.2	8x4	10x5	13x6.5	17x8	19x10
Pitch	0.5	0.7	0.8	1	1.25	1.5	1.75
